

"Your Change Today....Could Change the Life of a Child Tomorrow"

Father's Heart Projects Has A Mission Trip Planned for November 2019!

Can you help?

Dear Valued Supporters and Friends:

Jackie and I wanted you to know that an opportunity has come up and we are hoping to travel to our ministry area in Kenya on November 26th, 2019.

We will be visiting our school, our children, and training leaders at a one-week conference for pastors, leaders and married couples. We will also be conducting outdoor evangelical festivals in three different towns and working with the local churches for discipling new believers and providing teaching materials for local churches. Approximately 500 people are expected to attend this conference and we are both humbled and excited to share what God lays on our hearts.

We will also be visiting a local organic fertilizer manufacturing plant, which is overseen by a local pastor. At this point, they only have shovels and manual labour to produce the bags of organic fertilizer to sell in the open markets. The value of this opportunity is to create employment for people and elevate them out of poverty to a "middle class" situation by providing small business opportunities, therefore enabling disadvantaged people to support themselves and their families. Our hope is that we can raise the funds to purchase the equipment which will enable them to produce an increased amount of product, as well as employing additional workers. We estimate we can employ 30-35 people and profits will be directed back in to support our ministry and other potential business opportunities, such as green houses and fish farms.

By providing the financial assistance needed to propel these individuals into self-sustainability within their business, these underprivileged people will have the tools to become self-supporting for their families, which will in turn, have a positive outcome on their community as a whole. Our new model will potentially create a middle class who will gratefully move forward to a sustainable lasting future.

Our goal is to raise at least \$74,226. This will cover the cost of our trip (travel, accommodations, vehicle support, medical and ministry expenses totalling \$9,976., and \$64,250., for the Organic Fertilizer Production Ministry initiative, which includes production equipment, organic compounds and three months' production costs.

Would you consider financially supporting myself and Jackie, for this upcoming mission trip, assisting with expenses and making our new development program a success?

Thank-you from the bottom of our hearts for your prayers and support, enabling us to provide hope - in many cases - to the hopeless.
